

SO YOU WANT TO START A BLOG

FIRST THINGS YOU NEED TO DECIDE

What is it you want to write about?

What platform do you want to be on?

We're going to concentrate on WordPress.org

Here's a great post explaining the difference between [.org](https://WordPress.org) & [.com](https://WordPress.com)

What you need to have:

Domain

Web Hosting

Bluehost will provide you with both.

This should be your first step.

Next steps:

Install WordPress

Install Theme (framework)

Next steps:

Install Plugins

Install Header

Create Pages

Create Menus

Customize
